About Me

Full Stack Web Developer with expertise in React.js, Next.js, WordPress, Laravel, Node.js, and cloud platforms (AWS, Azure, GCP). Experienced in building SaaS platforms, booking systems, AR-based admin applications, e-commerce solutions, CMS websites, and scalable UI/UX-driven web apps.

Education

COMSATS University Islamabad, BS Computer Science

Punjab Group of Colleges, ICS

Margalla Learners School Islamabad, Matriculation

Experience

React Developer, TeraBit IT Company

- Developed company website using React.js with modular architecture
- Built AR-based admin panel with dynamic components and real-time management
- Contributed to Turkish e-commerce platform inspired by Sahibinden.com
- Worked on scalable frontend systems with reusable component architecture

Frontend Developer, Social Swirl (Remote)

- Built responsive React.js interfaces for production web applications
- Collaborated with design and backend teams for UI integration
- Improved UX with reusable components and responsive layouts

Projects

TeraBit IT Company Website [Live Demo]

- Built a corporate website using React.js with modern UI/UX principles
- Implemented responsive design and optimized component structure
- Ensured performance optimization and SEO-friendly layout

Augmented Reality (AR) Admin Panel

- Developed admin dashboard for AR-based web application
- Built dynamic UI components for user and content management
- Implemented real-time data interaction and control systems
- Focused on scalable architecture for enterprise-level usage

Primus Booking – Multi-Platform SaaS Ecosystem

- Customer Portal: [Live] Business Portal: [Live] Admin Panel: [Live]
- Built full booking ecosystem (Customer + Business + Admin platforms)
- Implemented Supabase Auth (email, Google OAuth, recovery, verification)
- Developed role-based access control using Next.js middleware
- Created booking system, scheduling, and reward points module
- Designed scalable architecture using Next.js App Router + TypeScript

Beam Balance – Document Management System

- Built secure document management platform using Next.js

- Integrated AWS storage for file upload and retrieval
- Developed admin/client dashboards for document tracking
- Implemented scalable cloud-based architecture

Monetize 360 Global [Live Demo]

- Built marketing website with SEO optimization and lead funnels
- Integrated EmailJS for contact forms and Framer Motion for animations
- Configured Google Ads for monetization and conversion tracking

Vidlo – Video Platform Website (WordPress) [Live Demo]

- Developed a full video platform website using WordPress and custom theme
- Implemented responsive UI, custom page layouts, and plugin integrations
- Optimized site speed, SEO metadata, and mobile performance

Pro Content Radar – Content Marketing Platform (WordPress) [Live Demo]

- Built a content marketing and radar platform using WordPress CMS
- Customized Elementor layouts with advanced styling and responsiveness
- Integrated lead capture forms, analytics, and SEO plugins

Gifted Curators DC – Art Curation Website (WordPress) [Live Demo]

- Designed and developed an art curation website using WordPress
- Built custom pages with gallery layouts, WooCommerce, and event sections
- Ensured cross-browser compatibility, accessibility, and performance tuning

Tea Station [Live Demo]

- Built responsive product website using HTML, CSS, and JavaScript
- Designed mobile-first UI for product browsing and optimized performance

Organization Task Tracker [Demo Video]

- Developed task management system using Angular + Laravel
- Implemented role-based access control, task tracking, and reporting features
